## *Unique Exclusive* What is the Consumer Buyer Protection Plan?

The Consumer Buyer Protection Plan is a simple, yet thoroughly drafted plan for the installer to follow, guaranteeing "Zero Call Backs". The CBPP ensures the integrity of the lighting system.

### *Zero Call Backs*

If an installer uses Unique Lighting Systems products for the complete lighting system (transformer, fixtures and hub), we are able to warranty the system against corrosion, wicking, oxidation and polarity issues.

### *Full Warranty*

Since we are unable to warranty workmanship, the CBPP serves as a check system to ensure your contractor is installing your system correctly. The key is the Verification Forms; the installer must perform three critical functions to ensure Unique Lighting Systems and the client: No overloads, No shorts, 11.5 volts to the lamps, Not to be over-volted, Not to be under-volted, No blown fuses, The perfect installation and Zero call backs.

### *Integrity*

Here's how it works....

Step 1. The installer must fill out the supplied Verification Forms. This means they must check the primary amps on the transformer with an amp probe, make sure there are no more than 16 amps on the secondary side and there are 12 volts to the Satellite Hub.

Step 2. The installer must complete the Lamp Replacement Chart,

Step 3. The installer must complete the As-Built.

### *Lifetime*

When the installer has completed this thorough inspection process, Unique Lighting Systems can warranty the system FOR LIFE.

## The Unique Lighting Power Management Hub System

LIFETIME WARRANTY (ON THE ENTIRE SYSTEM)...

Unique is the ONLY manufacturer that will warranty the fixtures, the wire connections, and the transformer, essentially the entire system, for life! This one of a kind lifetime warranty protects homeowners not only against rust and corrosion of the fixtures, but also the sockets, all related hardware, wire connections and the solid brass construction. Working harder and smarter, we continue to manufacture the most innovative and longest lasting landscape lighting products.

### Step 1

Home run #12/2 wire

#### The Multimatic Power Transformer

- Independent voltage taps (ranging from 12 to 22 volts)
- Compensates for voltage drop from transformer to hub
- Delivers proper voltage to each hub with the ability to have multiple hubs

Satellite Hub

### Step 2

#### The Satellite Hub

Pulsar

Distributes proper voltage evenly to every lamp

Eliminates wire connections below ground

Secondary fusing at the hub allows fuse sizing according to load or wire size

Makes installation easier and more consistent with fewer problems

Big Bang

Starburst

### Step 3

#### The Fixtures

- Completes the system
- Pre-wired, 25 or 50 feet, #16-2 wire lead
- Eliminates the need for sealed wire nuts
- All connections are above ground or sealed within the Satellite Hub housing

# Odyssey Transformer Series

## The Powerstar

*Signature Series*

Removable, hinged door

Each circuit is  
independantly fused

Snap in photocell ready

Independant lugs for each homerun

### Features and Benefits:

- Industry first individually replaceable fuses on each run.
- Brass can with weathered brass finish
- Replaceable secondary circuit fusing
- Removable photocell
- Primary fuse protection
- Digital timer ready/analog timer ready
- Sequencer ready
- Hinged, lockable door
- 110v wiring compartment
- High temperature rating

In addition to having the highest quality parts, you need to have an integrated system to create a lighting portrait. Inconsistent light output between fixtures is known to ruin most lighting portraits. For this reason Unique developed the Equalizer™ Hub Wiring System. Using the Multimatic Power Transformer, the Equalizer™ Hub Wiring System, and our top of the line fixtures, Unique has created the only system that produces even lighting output at every fixture. Unique Lighting fixtures come with a 25-foot wire lead that taps into the Equalizer™ Hub creating a simple, and maintenance-free lighting system!

FHUB

The Equalizer™ wiring system has proven to be a breakthrough for landscape lighting. It allows you to receive equal voltage to every lamp every time! The Equalizer™ Hub ensures proper voltage distribution and can be used with one or more fixtures. It ensures no connections in the the ground and uses only two connections per wire run. The Equalizer™ Hub includes two barrel lugs with lithium greased caps . The black housing blends discreetly for above or below ground installation.

The Satellite™ Hub is the ultimate In-Line fuse protected wiring system. It allows you to size the fuse according to load or wire size. Unique includes a replaceable 20 amp fuse at the point of connection to make troubleshooting accessible, convenient and fast. The Satellite™ Hub ensures proper voltage distribution and can be used with one or more fixtures. The Satellite™ Hub includes three barrel lugs with lithium greased caps and a In-Line 20 amp fuse. The dark brown housing blends discreetly for above or below ground installation.

## LONGEST LAMP LIFE AVAILABLE...

Two key items to consider before making your landscape lighting decision are lamp life and color of light emitted from the bulb. Being the innovator in the field, Unique uses lamps that produce the best illumination while lasting the longest period of time. All of Unique's Odyssey fixtures come with a high quality Halogen or Astro-Brite lamp that will last between 4,000 to 20,000 hours, giving you years of trouble-free operation. Most importantly, the lamps produce beautiful white light that preserves the natural color and aesthetics of your landscape and property.

## EXCLUSIVE TO UNIQUE...

Astro-Brite lamps give adequate light levels with minimum energy usage, ensuring Level 1 light output onto hard surfaces. With it's up to 20,000 hour rating, the Astro-brite will out-last any other lamp. In addition, unlike halogen, the Astro-Brite is unaffected by the oils on your fingers. All bi-pin sockets are stainless steel to last a lifetime, along with being factory greased to prevent corrosion and pitting. It also incorporates an extra heavy-duty ceramic socket rated for 25 amps.

All components are replaceable.

Unique Lighting is dedicated to supporting Architects and Designers. With our Power Management System and superior lighting components, performance and versatility are guaranteed.

Our Consumer Buyer Protection Plan guarantees our system for a lifetime and ensures you that we stand behind our products.

Along with our Protection Plan, Unique Lighting provides technical assistance, design help and contractor referrals to ensure that your lighting portrait remains beautiful for a lifetime.

## The Innovators of the Low Voltage Lighting Industry

- First to offer an Inverted transformer series
- First Multi-Tap 12-22 volt transformer
- First Equalizer Hub System
- First solid brass fixture to offer a Lifetime Warranty
- First to offer a 15 Year Warranty on copper fixtures
- First to offer 25 & 50 foot wire leads on fixtures
- First to offer lenses with each fixture
- First to offer encapsulated direct burial transformer
- First to offer a stainless steel transformer can
- First to offer a solid brass transformer can
- First to offer uniform fixture pricing
- First to offer a 2-day, in-the-field lighting training course (Unique University)
- First to offer a Lifetime Warranty on the entire system

### SUPERIOR MATERIALS...

In order to provide you with a lifetime warranty on our fixtures, Unique uses the best materials available to withstand rust and corrosion. However, please be aware that all aluminum products will deteriorate over time from rust and corrosion due to the metal's properties. This is why we offer you Odyssey fixtures that are made from solid brass and Copper Knights fixtures made from solid copper with stainless steel lamp sockets. The solid brass construction can withstand the various elements associated with outdoor landscapes and it will last! Remember, it is not only how beautiful the finish is on the outside, but also what is underneath that counts. At Unique, lighting products are viewed as a lifetime investment!

### APPROVED POWER SOURCES...

ALL of Unique's transformers have multiple ETL Listings that meet all UL Standards that make it the safest and most versatile power supply available. Whether you need to power-up fixtures near water, in a structure, in the landscape or on the home, Unique's Multimatic Power Transformers are approved for all outdoor low voltage lighting applications.
